**STORMWATER POLLUTION PREVENTION PLAN**

SCALE: 1" = 20'

THIS PLAN HAS BEEN PREPARED IN ACCORDANCE WITH FDEP NPDES STORMWATER POLLUTION PREVENTION PLAN REQUIREMENTS.

CONTRACTOR TO INSTALL DROP INLET SEDIMENT FILTER ON ALL TYPE "F" INLETS.

FILTER FABRIC MUST BE INSTALLED UNDER ALL INLET GRATES, AT ALL TIMES WHEN INLETS ARE NOT PROTECTED BY SILT FENCE OR HAY BALES, UNTIL LIMEROCK BASE IS FINISHED AND PRIMED.

**NPDES Requirements**

- Federal Law prohibits all point source discharge of pollutants, which includes the discharge of stormwater associated with large (greater than 5 acres) construction activities or small (less than 5 acres and greater than 1 acre) construction activities, to waters of the United States without a National Pollutant Discharge Elimination System (NPDES) permit. Under the State of Florida's authority to administer the NPDES stormwater program, operators that have stormwater discharge associated with large or small construction activities to surface waters of the State, including through a Municipal Separate Storm Sewer System (MS4, i.e. Town, City or County), shall obtain coverage either under a Generic permit or an Individual permit.
- The owner will obtain the NPDES permit during the permitting process.
- The Contractor shall prepare the Storm Water Pollution Prevention Plan (SWPPP). Contractor may obtain information pertaining to the NPDES program online at [www.dep.state.fl.us/water/stormwater/npdes](http://www.dep.state.fl.us/water/stormwater/npdes). The Contractor shall be responsible for maintenance of the site in accordance with the SWPPP. The Contractor will be required to comply with all requirements of the SWPPP and have it posted on-site along with the Erosion Control Plan, the NPDES permit, and the completed Inspection Report Forms. The Contractor shall be responsible for all erosion control practices defined in the SWPPP and associated penalties for not complying with the NPDES requirements contained in the SWPPP and the NPDES permit. The cost of all compliance related activities shall be included in the bid submitted by the Contractor.
- The NPDES permit requires at least weekly inspections of the site and inspections within 24 hours following any rainfall event exceeding 0.5" inches. The Contractor is responsible for the weekly inspections and post-rainfall event inspections and these inspections are required to be made by a "Qualified" inspector. These inspections must document compliance with the permit and the SWPPP and the inspector shall complete the Stormwater Pollution Prevention Plan Inspection Report Form. The Contractor can obtain a sample copy of the Inspection Report Form from the Engineer. The Contractor can contact the FDEP at (850) 245-7522 for additional information on qualified inspectors or additional information on the NPDES requirements.
